

# Impulse **HAND SEALERS**

## FS-Series

Impulse hand sealers seal poly bags and other thermoplastic materials quickly and efficiently without any warm-up time. Depending on the model of the machine, material up to 16" wide and 10mil total thickness can be sealed. The sealers are equipped with a plug-in electronic timer which controls the different sealing times needed for different materials' varying thickness. The timer automatically beeps when the seal is done. Once the timer is set, the sealer will give a consistently flat seal.

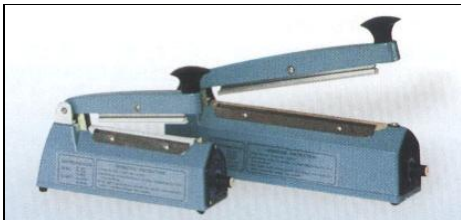

**FS-Series series** are compatible with the TISH-series sealers. They are extremely durable and economical. The sealers are light blue in color and available in 4", 8", 12", and 16" with a 2mm, 3mm, or 5mm seal width. The manufacturer's kit includes 2 elements and 2 Teflon covers.

**FS with cutter series** are available in 8" or 12" with a 2mm, 3mm or 5mm seal width. Seal and trim tubing in one step.

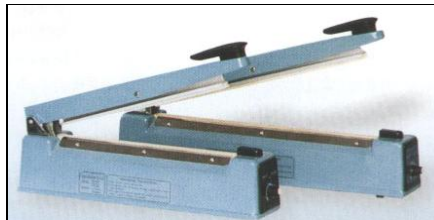

Round wire heating elements are available for **cut** and **seal** applications. No additional charges for the round cut wire. When ordering, add the letters **rnd** to the model number (example: 12" hand sealer with round cut wire FS-300rnd).

**Easy to operate:** Simply set the timer, insert the bag between the sealing bar & the sealing platform, press down the seal bar, and release bar after the timer light goes out. Once the timer is set, it will give a consistently flat seal. It is recommended that the user hold the seal bar down for a few seconds more after that light goes out to ensure enough time for the seal to cool and set.
